THE GENIUS OF STORIES: Stories are somehow able to bypass our mental filters. They allow us to imagine things that don't apply in real life. When we hear a story the normal rules are suspended and our imagination takes over.

'The most significant challenge to me during the seminar was to ask myself whether I can really trust God's Spirit to work in people's minds; or is it my responsibility to teach them everything?'

*'The Bible storytelling weekend has totally changed my view on evangelism both to **same culture** and **cross culture**. I think it is liberating to say the least. I am recommending that the storytelling workshop be the preferred training for people who have completed the Kairos Mission Awareness training.'*
